Normandy Harbor Insurance Company Partners With Platinum HR Management To Provide Enhanced Services For Policyholders

Normandy Harbor, an innovative and growing workers' compensation insurance carrier that offers customized plans to select Florida businesses, is partnering with Platinum HR Management to provide enhanced services to its client base.

Under the agreement, Platinum HRM will provide integrated payroll, premium collection and audit services to Normandy Harbor's workers' compensation clients. Normandy Harbor President Therese A. "Terri" Stevens says that this integrated approach to critical accounting functions will improve employers' cash flow, allow them to more accurately budget their insurance expenses, and simplify their reporting requirements.

"We focus on small and mid-size businesses, companies with unique financial and operational needs," Stevens says. "Platinum understands our clients' challenges, and will be developing strategic programs to help them more accurately plan their workers' compensation insurance expenditures. The addition of these payroll and premium services is reflective of our mission to provide our policyholders with cost-saving and efficient ways of managing their insurance needs."

"We share Normandy Harbor's commitment to helping Florida employers succeed," says Platinum Vice President of Operations Sean Campbell. "For over a decade we have customized programs for clients nationwide based on three core principles: ease-of-use, accuracy and transparency. We are excited about this opportunity to partner with Normandy Harbor and look forward to helping Florida policyholders save time, headaches and money."
