Normandy Harbor Insurance Selects Command Investigations for SIU and Anti-Fraud Services

Ft. Lauderdale, Fla.—Normandy Harbor, an innovative and growing workers' compensation insurance carrier that offers customized plans to select Florida businesses, has selected Command Investigations as its preferred provider of anti-fraud and SIU services.

Under the agreement, Command Investigations will provide SIU compliance programming, state anti-fraud plan filings, surveillance, customized background investigative solutions, and accredited training to Normandy Harbor's policyholders and staff.

"At Normandy Harbor, we focus on small and mid-size businesses, companies with unique financial and operational needs," says President Therese A. "Terri" Stevens. "Workers' compensation fraud is a multi-billion dollar problem in Florida, and smaller employers can be especially vulnerable. Our new partnership with Command Investigations offers our policyholders the same layer of protection often available only to larger companies."

Command Investigations President and CEO Steve Cassell says, "We are honored to be selected as the strategic resource and investigative partner for Normandy Harbor and its clients. As a Florida-based company, we are particularly sensitive to our state's business environment and the challenges that companies face in identifying and preventing workers' compensation fraud. We look forward to helping Terri's team and their policyholders fight fraud through our personalized training courses and electronic investigative services."

ABOUT NORMANDY HARBOR INSURANCE COMPANY
