Normandy Insurance Company Now Writing Workers' Compensation in Georgia

Deerfield Beach, FL – Florida based Workers' Compensation carrier, Normandy Insurance Company, is now offering coverage in Florida and Georgia as part of their ongoing growth strategy.

In addition to adding a new state, Normandy also brought all claims operations in-house in 2016 and has been assigned a Demotech Financial Stability Rating® of A (Exceptional).

“We will continue looking at adding additional states to enhance our expansion plans and are very excited to add Georgia to our portfolio.” says Normandy’s Senior Vice President, Jayson Buechler. “Becoming a multi-state carrier focused on Workers' Compensation, allows us to expand our footprint and increase our presence in multiple markets.”

Normandy has underwritten to a profit for five consecutive years and has invested heavily in systems and talent. We are now in an excellent position to execute our expansion plans and bring our outstanding customer service and claims handling to new markets, reports Buechler. “Since our founding in 2008, we have consistently expanded our services and sought out opportunities to grow methodically,” Buechler said. “The addition of Georgia is further fulfillment of our commitment to provide exceptional workers' compensation coverage to a wide range of employers.”
