**Normandy Insurance Company Announces
Expansion of Coverage to Louisiana**

Deerfield Beach, FL (March 12, 2019) – Florida-based workers' compensation carrier Normandy Insurance Company is now offering workers' compensation insurance to small, mid-size, and large businesses in Louisiana. This is the third major expansion by the multi-state insurer since the beginning of the year. Normandy now offers workers' compensation insurance in Florida, Georgia, Virginia, Pennsylvania, Texas, Oklahoma, and Louisiana.

“Our plan is, and always has been, to reach as many businesses across the nation as possible. Normandy’s unprecedented growth can be attributed to our flagship program that offers cost-efficiencies to fit any budget and preventative advice for a safer workplace.” says Normandy's Senior Vice President & Chief Underwriting Officer Jayson Buechler. “By offering a well-rounded approach to worker’s compensation insurance and keeping it all in-house – from prevention programs through to the claims process – our customers can be assured of exceptional personal service throughout.”

In 2017, Normandy Insurance Company was assigned a Demotech Financial Stability Rating® of A (Exceptional) in recognition of the company's strategic growth and solid business operations. Since that time, Normandy has expanded into five new states with no signs of slowing down in the future. With talented staff and a strong financial footing—Normandy has underwritten to a profit for many years—the company is well-positioned to provide innovative and cost-effective workers' compensation coverage in multiple states.

ABOUT NORMANDY INSURANCE COMPANY
